

BESPOKE SOLUTIONS IN TIMBER

SLIDING DOORS, FOLDING DOORS AND FIXED FRAMES

Welcome to Panorama Nordic

OUR MISSION

We are committed to providing homeowners, building contractors and architects with bespoke sliding and folding doors in timber.

With more than 60 employees, many years of experience and advanced technology, we manufacture products that fulfil the most demanding requirements in Europe.

OUR STORY

UAB Panorama Nordic is a part of the Strømmen Group - a leading player in the Nordic sliding and folding door market. Strømmen was established in 1884 in Norway and during all these years we have gained experience and knowledge that allow us to produce doors of the highest quality.

In 2005, we moved all our production activities to Lithuania, and we opened two new factories in 2015 and 2020 with a combined floor space of 7,600 square meters.

Customer value and long traditions are the core to everything we do at Strømmen Group.

SLIDING DOORS

All our sliding doors are crafted to last a lifetime. Experience the high-quality design and effortless operation even in large dimensions.

The Classic 66 profile has a slim and elegant design, and the Passive 76 profile is ideal for premium properties with high demands for energy efficiency.

We produce overlights in all shapes and dimensions.

FOLDING DOORS

The exclusive folding doors from Panorama Nordic meet the most challenging architectural requirements. Our folding doors are the best solution for creating a seamless transition between indoor and outdoor spaces.

We only use fittings of the highest quality in stainless steel. This ensures that the folding doors are quiet and easy to operate. The frame is produced from finger jointed pine and the panels are made of Accoya for excellent shape and stability.

TECHNICAL INFORMATION

Our long experience combined with traditional craftsmanship have made us able to produce unique doors. All our products can be customised to fit your project.

WOOD

The sliding doors are delivered in laminated finger jointed pine. The folding doors are delivered with frame in finger jointed pine and door panels in Accoya.

We also offer:

- Pine without finger joints
- Other types of wood (oak, hardwood, etc.)

GLASS

- Energy glass (standard)
- Safety glass
- Sun control glass
- Acoustic glass
- Coloured glass

COLOURS

- NCS colours
- RAL colours
- Water-based varnish
- Different gloss levels (aluminium cladding)
- Anodising (aluminium cladding)

HANDLES

Customise the doors with these stylish handles. The sliding doors are delivered with handle and cylinder on the inside, and finger pull grip on the outside as standard. The folding doors are supplied with handle and cylinder on both sides as standard.

OTHER OPTIONS

- Glass dividers
- Infill panels
- Horizontal ventilation
- Overlights
- ASSA cylinder

Why choose us

FAST QUOTES

Our estimators provide comprehensive quotes and technical drawings. We will ensure that the optimal products are selected for your building project.

PROJECT MANAGEMENT

One of our project managers will be assigned to your order as soon as it is confirmed. In this way, you have a single point of contact for all your concerns: technical guidance, documentation, production schedules and delivery.

MANUFACTURING

By having our own factory, we have full control over every aspect of the manufacturing process: improved lead times, better support and a wider product range.

DELIVERY

All our products are packed on custom-made pallets to protect them during transport and delivered directly to the construction site.
